

Environmental labeling – Recycling identification codes used by Jac for the packaging materials, transport, and protection.

In accordance with Commission Decision 97/129/EC, which establishes the identification system and alphanumeric coding for packaging materials used within the European Union, and the requirements of Regulation (EU) 2025/40 on packaging and packaging waste (PPWR), Jac maintains information on the packaging materials used for the packaging, transport and protection of its products.

The following table provides the alphanumeric identification codes for the packaging materials and components used by the company. These codes support the identification of packaging materials for recycling and waste management purposes and apply, where relevant, to primary, secondary and tertiary packaging.
